Author: Ron Davison – 35 (September 2020)

**Intro** E B C#m A

**Chorus 1**

While we're waiting for the end of time	E B	C#m A
Should we say our prayers, should we just not try	E B	C#m A
Is their any reason, is there any hope	E B	C#m A
And the path we took throughout our lives	E B	C#m A
As we sit here and wait for the end of time	C#m G#m F# F#	

**Verse 1**

These turbulent times are the calm before the storm	C#m B	G#m A
As our time marches on, the signs are there	C#m B	G#m A
And fast across the Arctic Sea, a sign of what's meant to be	E B A E	E

**Verse 2**

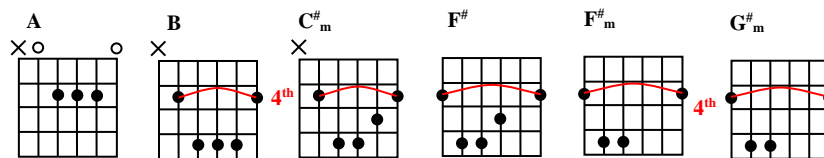

Looking inward the past tells tales	C#m B	G#m A
A blast of glass preserved in the rock	C#m B	G#m A
Of our lives, our legacy, our dreams they're not meant to be	E B A E	E

**Chorus 2**

While we're waiting for the end of time	E B	C#m A
Should we say our prayers, should we just not try	E B	C#m A
Is their any reason, is there any hope	E B	C#m A
Is the path we choose throughout our lives	E B	C#m A
As we sit here and wait for the end of time	C#m G#m F# F#	

**Verse 3**

Looking outward you can see the wave	C#m B	G#m A
Each decade brings the wave closer to earth	C#m B	G#m A
We've been dealt, no control, a reality that's meant to be	E B A E	E

**Bridge**

And all hell breaks loose as the giver of life  
 The land is torched, the oceans steamed  
 Massive lightning strikes as the earth stands still  
 The air full of ash, as the sun's shut out  
 Are you ready for the Stone Age  
 Yeah, a cosmic disaster  
 The climate's gonna change

Sheds its skin in a blast of deadly light  
 Tidal waves and winds like we've never seen  
 Total devastation like it's God's own will  
 A nuclear winter we could live without  
 It's coming and fast  
 Wiping out our future and past  
 So quit wasting my time and cash

**Chorus 3**

While we're waiting for the end of time  
 Should we say our prayers, should we just not try  
 Is their any reason, is there any hope  
 Our governments have failed us, we're on our own  
 As we sit here and wait for the end of time

If we just prepare, more will survive  
 Should we just bend over, kiss our ass goodbye  
 Moving underground will save the most  
 Prepare yourself now, don't live your life alone

**Outro**

Just sitting here, watching our fates unwind  
 Just Suspicious Observers trapped near the end of time
