

GSM - Grand Solar Minimum. You really should do the Research!

OPS-36 Holocene - Temperature-CO₂ Logic (Simplified-2)

More detail? climatechangeandmusic.com

Temperature fluctuations over the Holocene (including most of the MTR) are natural and have little to no contribution from CO₂. That is a **CLIMATE REALITY!** ← **C.R.**
The Catastrophic Anthropogenic Global Warming (CAGW) alarmist crowd are living in the **VIRTUAL REALITY** ← **V.R.** created by the IPCC Computer Modellers. CO₂ was more prominent over the MTR but it wasn't acting alone (even post-1950). Ignoring solar forcing is a huge mistake. The GSM has started and will not be kind to us.

Holocene T-CO₂ Logic Simplified-2

The sun, (not CO₂) is the primary climate driver!

The solar cycles are not included in the models.
The cold is coming, just like every other natural cycle over the Holocene!
It's time to get Ready!
