# OPPS-11 Justin's New Carbon Tax

Justin, where is the scientific justification (empirical CO<sub>2</sub>/temperature data showing CO<sub>2</sub> driving the climate on any statistically significant historical time scale) for your dramatic Carbon Tax increase.

Oh, that's right there is no empirical data and therefore no justification!! This could easily be the most financially incompetent federal government ever. Pushing forward on the "Great Reset" and "Climate Change" will just solidify that title.

## Justin's New Carbon Tax

You might want to "REIGN IN THE FOREIGN SPENDING" and help the citizens of your own country!

Justin, stop trying to save the planet from CO<sub>2</sub> (a manufactured crisis) and focus on the real problems right in front of you (our current COVID-19 induced financial crisis and the constitutional crisis you have created). Western separatism is growing and your ideology is fanning the flames. Canada's economy is going to struggle significantly without a strong energy industry.
