

The website focuses on Climate Change but political positions and COVID-19 have all become intertwined!!!

OPPS-18 Vaccine Passport Logic

More detail?

climatechangeandmusic.com

Let me get this straight:

We are being forced to take a very expensive "vaccine" (gene therapy) that has exactly "0" long term testing, has already been shown to have serious side effects (VAERS, CMS MediCare statistics) and does not stop infection or transmission.

But, doctors cannot prescribe off label use of either hydroxychloroquine or Ivermectin, two very cheap drugs that have shown very positive indications for the treatment of COVID-19 and have decades of widespread use with minimal safety issues.

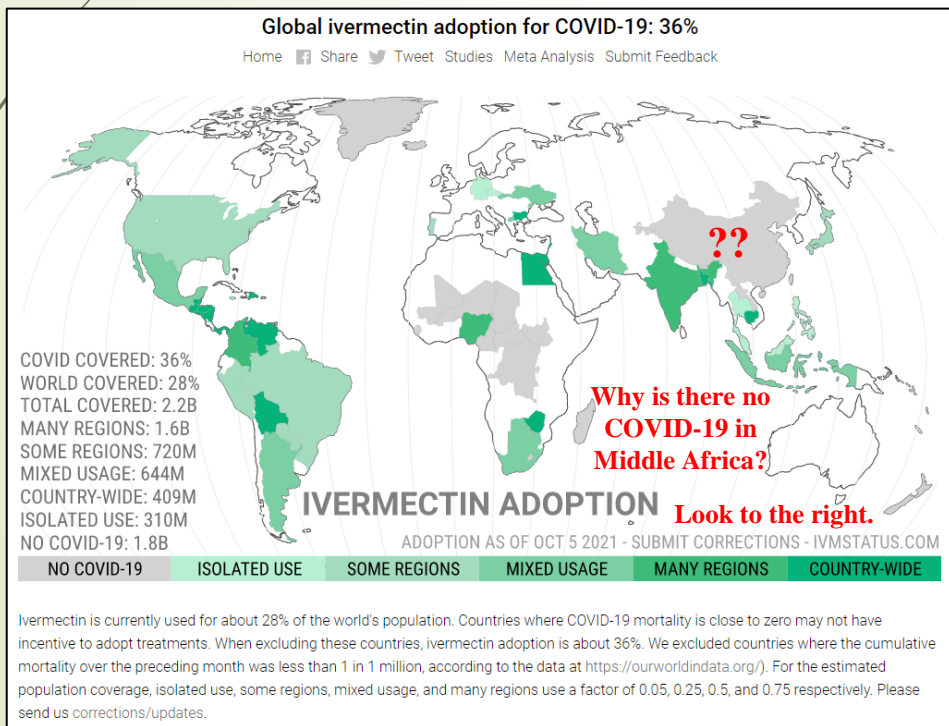

Vaccine Passports are useless and discriminatory given that the vaccinated can both contract and transmit the COVID-19 virus and natural immunity is completely ignored!

Canada (like many other countries) is lead by an idiotological UN cheerleader that ignores the real science on most subjects to promote the pseudo-science that is routinely spouted by the various New World Order, UN Agencies.

Why has there been a focus on experimental vaccines (that are looking more and more like a therapeutic) and censorship of available potential therapeutics?

Why is there no COVID-19 in Middle Africa??

Look to the right.

Vaccine Passports and Therapeutics

Beware

The COVID-19 Lockdowns were just a precursor to the more dangerous and longer-term coming Climate Lockdowns.

As Dr. Malone (inventor of the mRNA vaccine method) says, strange that countries that historically use Ivermectin regularly do not seem to have much of a COVID-19 problem when compared to the countries that do not. Peak Daily Deaths in Middle Africa (~15/100K) versus a 15 times poorer showing in North/South Africa (~225/100K). Many prominent physicians/research scientists have had success with Ivermectin and Hydroxychloroquine and are being routinely ignored/censored.
