

OPPS-19 COVID-19 &

Climate Change

Climate Change and COVID-19 are being connected on a lot of levels. Computer Models have been used to spread the fear porn that exaggerates the potential problems. And if you liked the COVID-19 lockdowns, you are going to be giddy over the coming climate lockdowns. These “leaders” are taking us down an unnecessary path to economic ruin. “Climate Change” has been the slow, long unnoticed, underground “UN Agenda/Communist” burn, the WEF/Great Reset is the accelerant. And all we will experience is a “Great Regret”.

Time to Wake-up!!!

COVID-19 & Climate Change

The UN/WEF – NWO Puppets and their minions say they use the “science” (not limited to COVID-19 and “Climate Change”). But do they really? They use partial truths, omit data and push out propaganda to maintain their unscientific narrative. They do not engage with the very qualified doctors and scientists shown to the left and right here (a small sample of thousands of very concerned logical world citizens) that have valid scientific, technical, societal, environmental and economic concerns with these very damaging policy decisions. They routinely denigrate those they cannot debate openly by labeling them deniers, spreading personal disinformation and in many cases outright censorship and demonization (not a strong scientific position). What are they afraid of? Debate, the truth, the “real” science, the data, the general public response when the public wakes up? All of the above! Despite decades of “research”, there is no empirical CO₂/Temperature dataset that shows CO₂ driving the climate on any statistically significant historical time scale. COVID-19 “research” is still in the very early stages of data acquisition. But it has become very obvious COVID-19 is subject to the same misuse of the scientific method that plagues “Climate Change” and so many other subjects. Listen to the real scientists, not the political establishment.
