

OPPS-24 Globalist Chess

More detail? climatechangeandmusic.com

Life can generally be viewed as a game where you make moves, that will have consequences (good and bad, brilliant to devastating) but all with the intention of making a good life for you and your loved ones. The vast majority of us do not play the game with the intention of destroying others (after all, there is room for everyone to succeed at a variety of levels).

Unfortunately, there is a small minority that want to succeed at the expense of the general population. These are, for a lack of a better term, the “Globalists” and they play “Globalist Chess”. They have pawns throughout the world and (as per Klaus Schwab from the WEF) have infiltrated many political cabinets.

“climate change/society summarized in a song video”
“WAKE THE WOKE”

We all need to step up and speak up for our children’s future. And we need to do that now!!

We need to turn a corner soon or our path to Totalitarianism will be set in stone.

There is no Climate Emergency and no need to ‘Just Transition’ or ‘Build Back Better’!

Standing up to the “Globalists” seems daunting given their political and financial clout, but we (the taxpayers) have been making gains.

People are waking up to the totalitarian policies being pushed by organizations like (but not limited to) the UN and the WEF, along with their political, business, academic, media, etc. minions. Their

Climate Change, COVID-19, etc. narratives are falling apart under the harsh realities of the energy, food, supply chain, financial, excess death and other societal crises we are currently facing. My focus (for a long time) has been and will continue to be “Climate Change” (which seems to be intertwined with all these crises). I am just one of those small players on the board, but there are many others (with common sense and prominent scientific and business backgrounds). In the end, we can overwhelm the globalist agenda by flooding the board, voting their puppets out of power and continuing to point out the gaping holes in their science, their economics and their societal positions. Ardern (New Zealand) and Vanguard Capital (torched ESG), as examples, were recently taken off the board. More to come.

Globalist Chess

Globalist Chess

WEF-SP - Strategic Partners | World Economic Forum (weforum.org)

This is Oil, Gas and Agricultural Country and we are under attack!
The board is stacked against us, but all the players off the board (you, the taxpayers) can and need to participate and get on the playing field!

Canada’s Front Line
They want to take our land, energy, food, medical security, and freedom off the board!
Ridgeclough
Their pawns come from politics, media, entertainment, NGOs, etc.

Their army is their Strategic Partners
Premier Alberta
Premier Saskatchewan
A Little Southwest of Lloydminster

We, the people can/must make a difference!!
