

GSM - Grand Solar Minimum. The real "Climate Change" existential threat is right around the corner. Do the Research!

OPPS-30 Climate Change & Politicians

Do U.S. Presidents Matter for Carbon Dioxide Emissions Reduction? (R. Pielke Jr.) More detail? climatechangeandmusic.com

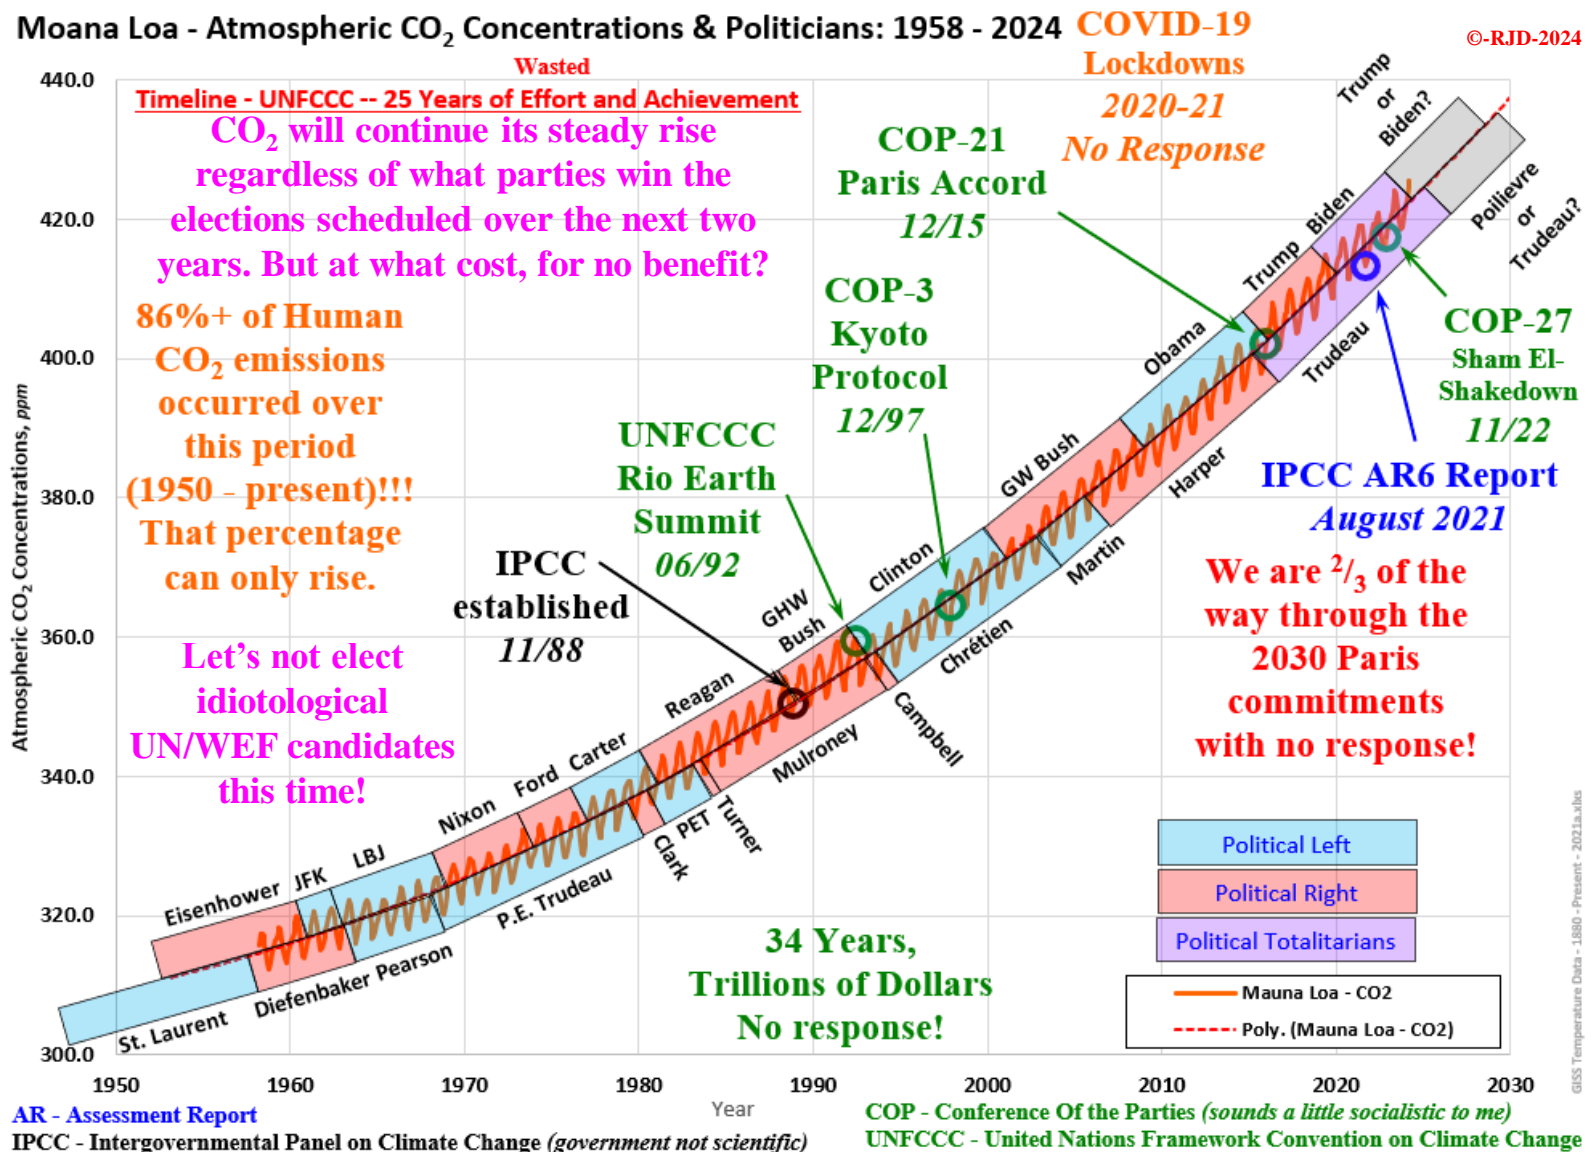

Change in U.S. Annual Carbon Dioxide Emissions from Fossil Fuels: By President Since 2005	
Bush (2005--2009)	-1.0%
Obama (2009-2017)	-1.5%
Trump (2017-2021)	-3.0%
Biden (2021-2025)	+1.6%
Overall (2005-2025)	-1.2%

entities (like the UN (IPCC), WEF, etc.), their political puppets (which could include every leader mentioned here), have had no discernible impact on CO₂ concentrations. The US and Canadian leadership is shown here, but the plot could be modified to include every

Science does not care if you are left or right on the political spectrum. Science does not care if you are janitor, stay at home caregiver, engineer or even a climate scientist (whatever that is defined as). Science relies on empirical data and its application within the Scientific Method. Without unmanipulated empirical data, any theory, hypothesis, narrative, etc. is virtually meaningless. The ideological 'Climate Change' (CC) alarmist narrative (All CO₂, All the Time) fails miserably under the Scientific Method. Despite the continuous edicts spewed out by global

Climate Change & Politicians

historical leader around the world. In Canada, Trudeau's CC policy results were no better than Harper's. In the US, Biden's results were no better than Trump's or Obama's (although Trump (-3.0%) was better at reducing CO₂ emissions than either Obama (-1.5%) or Biden (+1.6%). There are no control knobs that allow humanity to manipulate the global climate (despite the 'leaked' image to the left). Science over Ideology!
